About JD GreenTech Global

JD GreenTech Global is a leading green product distributor dedicated to meeting the market demand for ecologically sound and socially responsible renewable energy products and green products. Our expertise is uniquely focusing on connecting sustainable product manufacturers with residential and commercial consumers. With knowledge and dedication, we ensure the highest quality and low cost of green products with reasonable lead time under ever changing market conditions that satisfy the need of small and large scale customers.

We truly combine the "best of both worlds" – giving you the highest quality, best engineered, most affordable renewable energy and energy efficiency solutions and products. Our goal is to create useful products for home, office, and government that save money, conserve precious resources, and help protect the environment today and in the future.

Our projects and products cover the following:

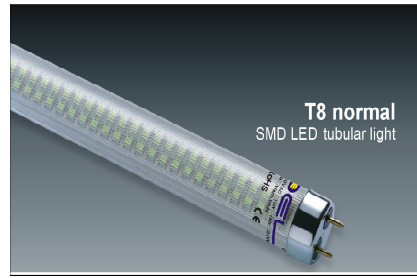

- Utility scale solar farm and residential solar project
- Solar street lighting system
- LED exit signs, lamps, tubes
- Fluorescent lamp

We believe that our company and employees should do well by doing good for our customers, our communities, our country and the whole humankind.

Solar Streetlight

LED Fluorescent Tube

High Power LED Lamps

Fluorescent lamp

LED EXIT Sign

LED RGB Swim Pool Lamp

LED Emergency Lamp

LED Down Light

Benefit of choosing our LEDs:

Skills – The ability to enhance the architecture and create desired atmosphere

Experience – Include retail, hospitality, commercial, municipalities, bars & clubs, transportation, historical and residential

Environmental – Significant energy savings, efficient and compliant lighting schemes

Cost Savings – Reduced energy costs, reduced maintenance costs, fit-and-forget installations, avoid over specification fittings

Knowledge – LED lighting technologies, drivers, control systems, standards, and calculations

Specialization – Our sole focus is the field of LED lighting

Independence – We are independent of all suppliers and building services firms. We strive for satisfying both your dreams and desires along with your pocket

Confidence – Our professional services will ensure the success of your lighting schemes.

5W RGB MR16

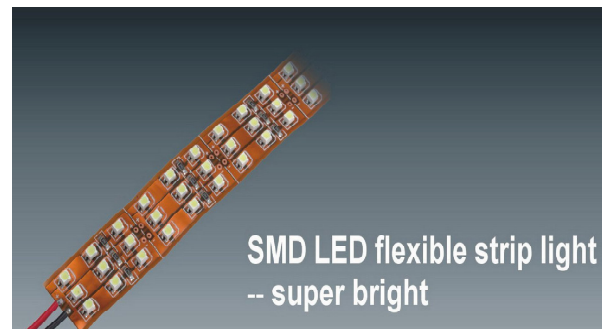

3W White MR16

14W Pure White LED Down Light

Super Bright SMD LED Flexible strip Light

SMD Flexible Strip Light

SMD Rigid Strip Light

Swim Pool Light

Swim Pool Light

LED Street Light with shield

LED Exit Sign

LED Exit Sign

JDR 10W E27 LED spot lamp

Why Solar

Solar technologies diversify our energy supply, reduce our dependence on imported fuels, improve air quality, and offset greenhouse gas emissions.

Why LED

LEDs are rated to have a 50,000+ hour lifespan, in this same amount of time you will buy over 50 regular incandescent bulbs or 5 compact florescent bulbs!

Even our most powerful replacement bulb (XR-10) uses only 10 watts of electricity, yet it performs on par with a 100 watt incandescent bulb and is due to the extremely efficient nature of LEDs.

Traditional incandescent bulbs waste 98% of their energy producing wasted heat. Earth LEDs on the other hand produce very little heat in order to maintain brilliant light saving and even assist in cooling costs.
